

Homemade lace cutter

©Verlane Desgrange 2005

**Actual size shown at top left
Make from hardwood
Use wing nuts for adjustments**

**Top guide is reversible.
Use flat side for straight
cuts or convex cuts. For
concave cuts, use curved
side as shown in bottom left.**

**Hand holding lace cutter
shows how thumb keeps
lace in place by not allowing
it to curl, thus giving a
wider lace. Use other hand
to pull lace through cutter.
Do not move cutter: instead
pull lace end. Use table to
support leather circle on.**
