Please also **send a crisp, in-focus photo** to give me a general idea about your bells.

**Terms of sale for all custom DIY kits:**

1. **Custom DIY kits must be paid in full** when you place a firm order. I will create a special product listing for your kit on my website. When that listing is ready, I will send an email to your preferred email address with a link to that product listing, so you can order that product and pay online.
2. **I will require about 3 weeks** to design and construct the kit after payment has been received. Shipping time will be in addition to this lead time.
3. **I offer no guarantees** about the accuracy of the design nor the appearance of the finished item, because the design of a custom DIY kit will be based on information solely provided by the customer and because the kit will be completed by the customer.
4. The **price for a custom DIY kit will be higher** compared with a similar ready-made DIY kit as sold on my website, due to the extra work involved to design and make a fully custom, one-of-a-kind product.
5. **I do not accept returns** of custom items. **I will not issue a refund** if a custom DIY kit does not work out the way you expect.

**Type or write your initials to show you accept these terms of sale:** \_\_\_\_\_
