

# Chap belt details

1. Showing front belt detail. Buckle belt is 1/2" wide. It is interlined with tape to prevent stretching. Two stainless steel tuck loops serve to keep the belt on the D-ring and another to act as a keeper for the 1/2" belt. D-Ring is stitched in a V shape to top layers before lining is put on. Crotch area is re-inforced with tape and a thin piece of leather.

2. Showing how belt lining is trimmed with small French edger type tool. Trim very close to stitching.

3. Showing how back part of belt is laced together.
