

Lap Skiving Jig

Direction of pull

1. Place strap on jig
2. Open splitter carriage to accommodate both layers of leather. The depth can be varied according to need
3. Place strap/jig combination in splitter
4. Close splitter
5. Grasp both pieces firmly and pull through
6. Touch up end with round knife if necessary

Actual size jig piece
(as seen from side and FS)

Make from 15 oz shoe soling
Cut approx. 5" x 1 1/8"
Form jig with a long even ramp
(you may have to hand skive to get the initial shape)
